

TEXTILES MATTER

Photography by Pim Top

Textiles satisfy many of our emotional and practical daily needs, providing warmth, protection, comfort, decoration, storytelling and tactile stimulation. The textiles industry, however, is also responsible for pollution, waste and environmental degradation.

That is why, for this edition of the Heimtextil Trends exhibition and publication, FranklinTill is curating Textiles Matter and focusing on the sourcing, design, and sustainability of materials. This materials-first approach spotlights the full textiles lifecycle, from fibre cultivation to afterlife, and is rooted in circularity.

We invite you to explore Make and Remake, Continuous, From Earth, and Nature Engineered – and we hope that within these themes, you will discover the potential for a better, greener, kinder textiles industry.

Make and Remake

Make and Remake celebrates repurpose and rejuvenation. A maximalist mix of color, print, pattern, and texture. Make and Remake is:

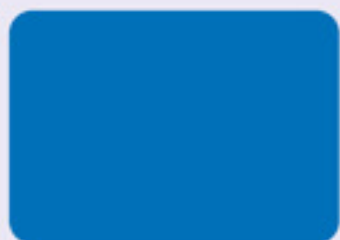

- + Joyous
- + Energetic
- + Imaginative
- + Ingenious

Colour Statement

A palette of nuanced brights represents colour that has been recycled and reclaimed. These saturated hues feature added complexity that suggests the effects of age, wear and transformation through time and processing. Challenging assumptions that conscious colour must be muted and dirtied, this palette boasts vibrancy and dynamic contrast.

Continuous

Designed for disassembly, Continuous aims for closed loops, zero waste and complete circularity. Composite finishes convey continuity in modular, minimalist collections. Continuous is:

- + Practical
- + Pared-back
- + Universal
- + Timeless

Colour statement

A minimal, pared-back colour palette celebrates modern, essential hues. From bright white through a series of warm greys and sage into sophisticated, classic blues and complex near-blacks, this palette elevates the classics with nuanced undertones and added complexities.

FROM EARTH

From Earth conveys deep respect for nature in all its richness and diversity. Natural variation and roughhewn finishes give eco aesthetics a crafted feel. From Earth is:

- + Tactile
- + Textural
- + Imperfect
- + Raw

Colour Statement

An earthen palette reflects organic matter and natural dyes. Warm, soft and muted, these botanical hues of plant origin range from complex takes of olive and lime to warm beige and pink, and bold indigo. This palette celebrates the beautiful natural variation and nuance of organic colour.

Nature Engineered

Nature Engineered magnifies the performance of organic materials through mechanical means. Undyed and unbleached yet soft, inviting and refined.

- + Natural
- + Regenerative
- + Smart
- + Functional

Colour Statement

A fresh and enlightened take on an architectural palette sees a complex spectrum of modern neutrals replace the cold, hard grey of an urban landscape. Reflecting a new and flourishing relationship with nature that is symbiotic and collaborative, these engineered natural hues have a clean, refined quality. From warm beiges and tan to green-brown and brown-green, this palette celebrates the coming together of nature and human engineering.
